

What our customers say:

Tidal Software is a leading global provider for enterprise infrastructure operations and application management solutions. Tidal solutions are used by the best-run data centers in the world including Microsoft, HP, T-Mobile and hundreds of others. Tidal products improve the efficiency of IT operations and general application performance in any environment.

"Synomic supported us in a broad range of our SAP alliance management, business development and go-to-market activities in order to leverage our leading solutions for the important SAP market. Ralf Meyer from Synomic helped us to develop and exploit different SAP partnering models and opportunities for Tidal."

Flint Brenton / CEO and President /Tidal Software

Emporis is a leading global provider of building related information used by hundreds of enterprise clients and ten thousands of people all over the world. Emporis created an innovative business model leveraging smart combinations of Web 2.0, communities, SaaS and classical business models.

"Synomic supported us successfully in our last fundraising round where we managed to win a leading German venture capital house to back our global growth strategy. Ralf Meyer from Synomic supported us also in 2007 and 2008 in a number of strategic areas including: sales strategy, implementation of product management and important processes. His deep software industry experience, his network and open pragmatic approach helped us a lot."

Stephan R. Boehm / CEO of Emporis
